## Software Developer

As a seasoned software developer with over two years of hands-on professional experience, I am committed to leveraging my expertise to contribute to innovative projects within dynamic and collaborative tech environments.

## WORK EXPERIENCE

<b>IONnovate LLC</b>	<b>February 2022 - December 2023</b>
Software Developer	Las Vegas - Remote

- Collaborated with a small, high-performing team and project manager to architect and develop sophisticated applications tailored for both commercial and private use.
- Played a pivotal role in augmenting and constructing key components for the proprietary API, laying the foundation for effective client-threat correlation and strengthening the core functionalities of our in-house systems.
- Performed rigorous internal testing on various tools and applications, identifying and implementing optimizations that resulted in notable performance improvements across the board.

<b>Concierge Software Design</b>	<b>June 2022</b>
Software Developer	Las Vegas - Hybrid

- Integral member of a focused team dedicated to both designing new software solutions and enhancing existing ones as per client specification, demonstrating a commitment to delivering top-notch products.
- Played a key role in conducting code reviews for potential clients and new team members, offering valuable insights aimed at improving performance, fortifying security measures, and implementing front-end enhancements to optimize product usability.
- Delivered quality Assurance services to clients, conducting thorough testing and meticulous bug tracking to ensure the highest standards of software quality and reliability.

## EDUCATION

<b>College of Southern Nevada</b>	<b>August 2019 - Present</b>
